New

New Diamond Footfile for sterilisation

Innovative Surface: Our autoclavable Diamond-Ceramic coating is highly abrasive and very careful to the skin.

Autoclavable Footfile - a new level of hygiene

The foot file has a durable coating of diamond ceramic. It can be sterilised and, with proper use and cleaning, can be used for many years.

The sterilisation process achieves a significant advance in hygiene in pedicure as well.

The file has two different grits on the front and back.

The innovative diamond coating allows a very gentle but effective reduction of dead skin.

DIAMOND FOOTFILE SMALL SIZE

1849 04 531

Length: ca. 23 cm

Stainless footfile with permanent diamond coating in two different grit medium / rough. Standard abrasive colour black.

A new size and design shape, which uses less steel, making it more cost-effective and very light weighted.

**Made
in
Germany**

THE NAILEDGE PEDICURE NAILFILE **1655 19 500**

For shaping toenails in difficult areas, 19 cm. Stainless steel with diamond coating.

New

Nailnippers

New Podiatry Nippers

This new line of nailnippers has a different spring design than our regular nailnippers. The turning spring can easily be turned out of function to work with the hand only to allow a maximum in-tough feeling. In addition, the nippers can be stored in a case more easily what is appreciated by mobile working podiatrists.

TRIANGLE POINTED TURNING SPRING NIPPERS 3051C13E531

Arrow-pointed corner nippers with a joint of increased strength and turning-spring. 13 cm total length with a small-pointed blade. The single spring allows a fast switch of work with or without spring and an easy transportation.

SMALL POINTED TURNING SPRING NIPPERS 3060C11E531

Fine and narrow pointed corner nippers with a joint of increased strength and turning-spring. 11,5 cm total length with a small-pointed blade. The single spring allows a fast switch of work with or without spring and an easy transportation.

Ergonomic Nailnippers

Homeuse pedicure made easy

Our new design for a nail nippers for more comfortable handling.

The nippers have a very round and smooth shape.

The handles have an extrawide design for a better handling.

The softworking spring is very easy to turn around.

The total length of 12 cm and the solid body provide a lot of strength and precision for easy shaping of toe-nails.

All nippers are made from stainless steel.

ERGONOMIC NIPPERS

3019 12 L + colour

Nail nippers with comfortable turning spring and large handles. 12 cm total length. With a concave pointed blade. Black matted handles.

All over rounded shape with new handles of a large diameter provide a very comfortable and ergonomic work.

A lot of space for your logo.

The new shape provides a large surface for beautiful prints.

Individual colour from only 300 pcs. The large surface of the newly designed handles increases the colour effect and brand identity.

Superfine Corncutter Blades

2700 handle

2701 00 0454

Professional Pedicure Tools

Experience the outstanding sharpness of the Kiehl blades. Extra thin and precision-ground, they cut very gently, effectively and precisely through dead skin areas.

The blades are double-sided and have a special anti-oxidation coating, which protects the blades during prolonged storage and helps to maintain their sharpness.

Our blades are thinner than those of most suppliers. However, the size corresponds to the standard size of Solingen blades. They can therefore be used for all handles based on this standard size.

CORN CUTTER REFILL 10 BLADES

2701 00 0444

Kiehl supersharp corncutter refill blades with traditional 10 pcs box.

CORN CUTTER REFILL 100 BLADES CLASSIC

2701 00 0454

Kiehl supersharp corncutter refill blades with traditional 100 pcs box with 10 boxes of 10 blades inside.

Corn Cutter Refills in New Packing

New

Save money and protect nature by less packing

We offer the popular Kiehl corn cutter blades now also in a new packing design for professional technicians.

The new packaging dispenses with the previously standard 10 blade sub-units. This was made possible by a new packaging method. This reduces the costs for the material and filling of these sub-units.

The new packaging contains 100 blades. Just like the conventional professional unit. However, it is considerably smaller. The smaller volume significantly reduces transport costs for buyers of larger quantities.

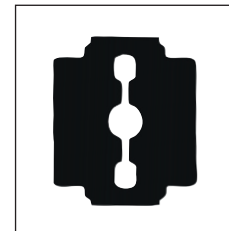

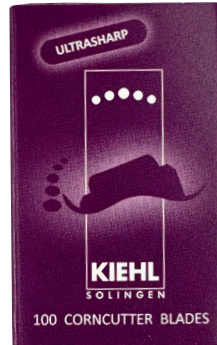

The new packaging can be simply opened and closed again like a matchbox. A single blade can be removed easily and safely. The blades remaining in the box are well protected. Each blade is individually wrapped in a special paper, which is very fine and soft so as not to affect the sharpness of the blade. At the same time, however, it is very strong and stable to protect the blades and enable good handling.

The outstanding quality of the blades remains unchanged.

CORN CUTTER REFILL 100 BLADES NEW BOX

2701 00 0464

Dispenser Packing with 100 Kiehl first quality corn cutter blades. Blades individually packed.

The box includes 100 blades. All individually packed in extra smooth and protective silk paper. For a safe handling and good protection of the blade.

Innovative design with relevantly smaller volume. For a very economic shipping and safe protection of blades.

With our supersharp Kiehl Corncutter blades. Very thin and sharp. With special anti-oxidation coating. They have the standard size and fit into all standard handles.
